About Me

Experienced developer with expertise in both traditional web development and blockchain technology

Full Stack & Smart Contract Developer with extensive experience

I'm a seasoned **Full Stack Developer** and **Smart Contract Engineer** with deep expertise in **EVM blockchain development**. My technical stack spans modern web technologies, blockchain protocols, and enterprise solutions.

My core expertise includes **JavaScript, TypeScript, Solidity, and Go**, with hands-on experience in building scalable applications using **NestJS, NextJS, and Kafka**. I've successfully architected and deployed solutions on **AWS infrastructure** using Kubernetes, Docker, and microservices patterns.

I have extensive experience with **enterprise technologies** including PowerApp and SharePoint development, as well as blockchain infrastructure like **Node OP Stack** and private blockchain networks. My work involves direct participation in project planning and solution architecture.

I specialize in **WebSocket implementations**, microservices architecture, and have contributed to projects using **Hardhat** for smart contract development and testing.

<Dev />

Full Stack Development

Expert in modern web frameworks and microservices architecture

Smart Contract Development

Specialized in EVM blockchain and Solidity programming

Cloud & DevOps

AWS, Kubernetes, Docker and infrastructure automation

Performance Optimization

Microservices, Node.js Stack and scalable architectures

Enterprise Solutions

PowerApp, SharePoint and enterprise integrations

Project Leadership

Direct participation and solution architecture planning

<Dev />

Technologies I Work With

Key Expertise Areas

Full Stack Development

End-to-end web application development with modern frameworks

Smart Contract Engineering

EVM blockchain development and secure smart contract implementation

Cloud Architecture

AWS infrastructure, Kubernetes orchestration, and scalable solutions

<Dev />

Enterprise Integration

PowerApp, SharePoint, and enterprise solution development

Featured Projects

Showcase of projects demonstrating expertise in blockchain development, enterprise solutions, and modern web technologies

Trading

Blockchain

<Dev /> DeFi Protocol Platform

A comprehensive DeFi platform built with smart contracts on EVM blockchain. Features include yield farming, liquidity pools, and governance tokens. Implemented using Solidity and Hardhat framework.

Solidity

Hardhat

NextJS

TypeScript

EVM

Backend

Enterprise Microservices Platform

Scalable microservices architecture using NestJS with Kafka message broker. Built for high-throughput enterprise applications with real-time data processing and WebSocket communication.

NestJS

Kafka

Kubernetes

Full Stack

<Dev /> Modern Web Application

Full-stack web application with NextJS frontend and NestJS backend.
Features real-time updates via WebSockets, AWS cloud deployment, and
CI/CD pipeline with GitHub Actions.

NextJS

NestJS

TypeScript

AWS

WebSockets

Infrastructure

Node Operator Stack

Private blockchain infrastructure with Node OP Stack implementation.
Includes custom consensus mechanisms, private sharing protocols, and
enterprise-grade security features.

Interested in Working Together?

I'm always open to discussing new opportunities and challenging projects. Whether it's blockchain development, enterprise solutions, or full-stack applications, let's build something amazing together.

Get In Touch

Ready to discuss your next project? Whether it's blockchain development, enterprise solutions, or full-stack applications, I'm here to help bring your ideas to life.

Let's Connect

I'm always excited to work on innovative projects and collaborate with forward-thinking teams. With expertise in **blockchain development**, **enterprise solutions**, and **modern web technologies**, I can help turn your vision into reality.
